

Claim Management Software Solutions

Get your Claims in the Cloud with ClaimVantage

ClaimVantage's Claim Management software solution automates Life and Health claim processing for insurance carriers, Third Party Administrators (TPAs), and self-insured employers, processing both group and individual benefits with accuracy and efficiency.

The platform is claimant centric, allowing you to see all insurance plans for each client across all lines of business, including historical claims with all information stored in one central location to improve the end customer experience.

Best in Class Claim Management

From claim intake to payments, ClaimVantage offers you a best in class claim management solution.

- **One Solution for Multiple Lines of Business**

Your team can now manage all lines of business, including both group and individual benefits, on one central platform. Sharing claim details among your team eliminates data duplication and increases productivity.

- **Claimant & Beneficiary Centric**

The platform is built with the claimant or beneficiary in mind, to ensure your team is equipped to deliver superior customer service. Benefit and payment calculations, corrections, automatic offsets, and scheduling increases the quality of the claims experience.

- **Configuration**

The software can be configured to map your current business processes and organizational structure to ensure a smooth transition for your teams. Your system administrators can now configure workflows, tasks, and adjudication processes across the platform, reducing costs for your business and minimizing your reliance on IT.

- **Automated Workflows & Tasks**

Workflows and tasks can be easily configured to ensure the right person is doing the right thing at the right time. Automating your business processes minimizes keystrokes and reduces the number of screens you must access during claims processing, increasing accuracy and maximizing productivity for your business.

- **Better Insights to Make Data-Driven Decisions**

With an increase in demand for better data insights, this Claim Management software solution equips you with a powerful reporting tool to predict trends, detect potential fraud, and make data-driven decisions to improve operational efficiency.
